OUR PROTECTIVE COATING

Home service professionals rejoice, we have solution for all of your clients needs! Our NON-TOXIC VIBRASHIELD™ application will take care of your clients home long after you leave. Make clients happier and protect their investment with our coatings.

ONE APPLICATION, YEARS OF PROTECTION.

HOW IT WORKS:

When you choose VIBRASHIELD™ you are getting FULL HOME PROTECTION. What this means is that your clients home will come alive with activity at the molecular level inside and out. This activity creates a powerful force that pulls in and destroys unwanted odors, bacteria, and while also protecting the interior and exterior surfaces, all the while never changing the look, feel or any other characteristic of the substrate. What sets us apart from regular coatings is that ours works around the clock, vibrating on a molecular level, which prevents strong odors, bacteria growth, UV deterioration and so much more. Thanks to the product's unique formulation, the active hydroxyls keep working 24/7, providing round-the-clock protection, extending the life of the homes surfaces.

ELIMINATE CURRENT & FUTURE ODORS

Vibrashield™ vibrates on a molecular level, which in turn scrubs odor causing bacteria. This scrubbing destroys odors before they ever become an issue. Forget about lengthy cleaning times, and let Vibrashield™ work for you.

PROTECT FLOORING FROM STAINS

Vibrashield™ has your interior covered from all angles. Not only do we eliminate bacteria causing odors, but we also strengthen the surfaces we're applied to. Our coating vibrates on a molecular level, which creates a strong barrier preventing stains from adhering into the fibers. Have a red wine spill? Simply wipe it up with water and mild soap.

ELIMINATE VOC'S

Vibrashield™ annihilates VOC's by destroying the bacteria at the source. Our molecules are constantly active, scrubbing bacteria and killing it prior to it emitting harmful volatile organic compounds.

STOP RUST AND CORROSION

Vibrashield™ disrupts the process of rust and corrosion by eliminating O₂ from the equation. Because our molecules take in oxygen and put them back out into the environment, rust doesn't stand a chance at forming.

APPLY VIBRASHIELD™ IN MINUTES

SIMPLE PROCESSES FOR ANY STYLE HOME

VIBRASHIELD™ IS APPLIED IN JUST A FEW EASY STEPS.

1. Clean the home thoroughly to remove any existing dirt, stains, dust and any other debris inside the home.
2. Once the home is spotless, Vibrashield™ is applied using a fine atomized mist gun. This saves a tremendous amount of time on the application process.
3. The mist is applied in a single direction, using fluid motion as you work your way around the home's surfaces.
4. Once applied, Vibrashield™ cures in minutes.

**TOTAL APPLICATION TIME (OUTSIDE OF CLEANING) AVERAGES 1 - 2 HOURS
FOR A STANDARD HOME.**

A MESSAGE FROM OUR CEO

VIBRASHIELD™ was founded to make a difference in the way your clients enjoy their home. We care about your clients investment and have specifically developed our products to ensure their home stands the test of time.

Our goal is for your clients to be able to enjoy their time at home, resting easy knowing their home is protected for years to come. We know the hassles that come along with owning a residence, and we have specifically developed our formulas to combat those. We know how important your work product is to your clients and we hope to make it that much better with our protectant molecule application.

We look forward to a future partnership with you and know it will be one you won't regret.

Chase Dowling
President & CEO
